To celebrate Open Access Week, Digital Scholarship (http://digital-scholarship.org/) is releasing version one of the Institutional Repository Bibliography. This bibliography presents over 620 selected English-language articles, books, and other scholarly textual sources that are useful in understanding institutional repositories. Although institutional repositories intersect with a number of open access and scholarly communication topics, this bibliography only includes works that are primarily about institutional repositories.

Most sources have been published between 2000 and the present; however, a limited number of key sources published prior to 2000 are also included. Where possible, links are provided to e-prints in disciplinary archives and institutional repositories.
